

Dormitory and 20,000L Water Tank
Kadungulu Secondary School, Serere
Partner: Billington Vocational Training Centre
Social Enterprise Training

Project Overview:

The dormitory at Kadungulu is HYT's first structure in Uganda's northern Teso region. The project was funded by Andrew Billington and involved the training of 11 students from Billington Vocational Training Centre. The team overcame issues from language barriers to severe drought, finishing the project on time and in style. The newly trained Interlocking Stabilised Soil Block (ISSB) masons will continue to build using this sustainable technology.

Feedback:

"The community of Kadungulu is very supportive of the project."

- Richard, Chairman of the Board at Kadungulu Secondary School
