

4 20,000L Water Tanks Across Kamuli Region

Kidiki, Kyeeya, Namwendwa, Ndalike

Lunch4Learning

March—July 2017

Project Overview:

HYT was thrilled to partner with Lunch4Learning in 2017, this time to bring clean water to 4 rural schools. 7 HYT-trained masons worked in a team to build top quality tanks out of Interlocking Stabilised Soil Block (ISSB) technology. The schools and their communities played a key role in the project by feeding and housing the workers during construction. They have been equipped with manuals and tools for the maintenance of the new water sources!

Feedback:

"We no longer wait for water at the borehole and we are serving porridge on time!"

- Zake Joseph, Head teacher at Kidiki Primary School

Cost:
US \$9,600

No. of Ugandans Employed: 7

No. of School Beneficiaries: 3,342

Project Number: 106
