

# 1V7 - St Peters Nakibungulya Primary School

## Six Classroom Block Refurbishment

Jan 2015 - May 2015

### Project Overview:

The original classroom block at this primary school was hardly fit for teaching. There was only a dust floor which meant jiggers were causing problems in the children's feet and the lack of windows and doors allowed the elements in. The new building allows children to study without distraction. The P7 classroom was also fitted with a solar light so the students can have evening classes in exam season.

### Feedback:

"It is now looking very nice and has totally eradicated the problem of the jiggers"

- Mr Nelson (P7 Teacher)

**Total Cost: \$19,047**
