

Great Hope Drainage

Water tank and drainage system

10/10/2015 - 24/10/2015

Project Overview:

A 20,000L water tank and drainage system has been installed at Great Hope Primary school. The tank will be used for cooking, washing and drinking. A first-flush system has been added to the water tank to ensure that the dirty water from the roof is removed from the water used by the students and staff at the school, improving hygiene.

Feedback:

“We are really pleased by the drainage system at Great Hope”

Total Cost:

Funded by Jinja Educational Trust

Project Number: 088
