

Nabirama Primary School

Classroom block and one-class learning centre

11th May 2015 – 11th August 2015

Project Overview:

HYT constructed a two classroom block with a central room containing 20 iPads for the children to be taught maths. The software on the iPads to teach the maths was designed and produced by OneBillion. A solar panel on the roof of the classroom block provides the power to charge the iPads when they are not in use. Using this software, children will learn maths without realising that they are learning. HYT also constructed a water tank alongside the classroom block to provide water for the school.

Feedback:

"This classroom block and water tank is a fantastic addition to Nabirama Primary School"
~Charles, Headmaster

Total Cost: \$23,887

Funded by HYT

Project Number: 087
