

Energy-saving Kitchen, 2 Water Tanks

RAVO Primary School

With Peter Bond

April - August 2016

Project Overview:

Our second set of buildings at the refuge for AIDS victims and orphans was again generously funded by Peter Bond. Thanks to him and the HYT graduates employed on the project, the inhabitants of the two HYT-built dormitories now have access to clean water and regular food. The two water tanks sit either side of the dormitories to collect rainwater from the roofs, contributing along with the energy-saving stoves to efficient use of resources.

Feedback:

“The tank looks great - very smart - and the water looks clean and inviting!”

- Peter Bond

Total Cost: \$3,305

(UGX 11,200,000)

Project Number: 097
