

Great Hope Primary School

VIP Latrine

Dec 2015 - March 2016

Project Overview:

A new latrine was built at Great Hope for the students and staff. It sits above a 25ft deep pit which is lined like a water tank. The advantage of this is that it can be emptied and refilled rather than being single use. This design expands the lifetime of the structure and, thanks to added ventilation, reduces unpleasant odours. It also has an integrated urinal for boys which diverts liquid waste from the pit.

Feedback:

“We are very proud of the effort that has gone in to make this latrine the most functional to date”

Marcus Farnfield (Country Manager)
