

**1V8 - 4 classroom block**

**St.Muluba Kisege Primary School**

**May 2015 - Oct 2015**

### **Project Overview:**

This brand new four classroom block and 12,000L water tank has recently been built by the 1V8 trainees. This was no easy task as we wanted to use new roof design on the L-shaped building to make the classrooms as bright as possible. We also used a new, red rough-cast finish which is durable and cost effective.

### **Feedback:**

“We are very happy! Pupils are no longer distracted by passers-by e.g motorcycles as the classrooms provide a quieter learning environment. It is also much easier to control classes and the larger black-board and lighter rooms means they can all see the front.” - Sarah, Head Teacher

**Total Cost: \$27,466  
(UGX92,368,100)**
